Attachment:

- Financial statements Quarter III/2026.
- Explanation Statement.

Organization representative
Authorized person to disclose information

Lưu Phương Uyên

Number: 40/CV-VGR

Hai Phong, October 16th, 2026.

To: - STATE SECURITIES COMMISSION
- HANOI STOCK EXCHANGE

Pursuant to the information disclosure regulations of organizations listed on the stock market, VIP Green Port Joint Stock Company (stock code: VGR) would like to explain that the profit after corporate income tax in the Profit and Loss Statement for 3rd quarter of 2026 compared to the same period last year has fluctuated by 10% or more in the Financial Statement as follows:

Currency: Vietnamese Dong

STT	Items	Quarter III 2025	Quarter III 2026	Difference	Percentage of difference (%)
1	Profit after tax	125,210,498,917	109,430,406,184	15,780,092,733	-12.6%

Main reasons:

Geopolitical factors have driven up fuel costs. In addition, during the third quarter, the Company incurred land rental expenses of VND 10.9 billion for the area currently in use following the expiry of the preferential land-rent exemption period.

These are the main factors leading to the decrease in profit in the Third quarter of 2026 compared to the same period in 2025

Sincerely.

Receiving:

- As above

NOTES TO THE FINANCIAL STATEMENT3rd Quarter of 2026**I- CHARACTERISTICS OF THE COMPANY'S OPERATIONS****1- Capital ownership structure**

VIP Greenport Joint Stock Company is an enterprise operating in accordance with the Law on Enterprises of the Socialist Republic of Vietnam.

The Company's charter capital is: 822,249,590,000 VND, contributed by shareholders, specifically as follows:

	Contributed capital (vnd)	Ratio (%)
- Vietnam Container Shipping Joint Stock Corporation	446 875 000 000	54.35%
- Evergreen Marine Corp. (Taiwan) Ltd.,	178 750 000 000	21.74%
- Leadvisors Capital Management Company	122 650 000 000	14.92%
- Other shareholders	73 974 590 000	8.99%

2- Business sector:

Port operations

3- Business lines:

VIP Greenport Joint Stock Company operates under Business Registration Certificate No. 0201579242 issued by the Department of Planning and Investment of Hai Phong City on 28 October 2014, with the sixth amendment dated 20 August 2025, with the following business lines::

- + Cargo handling (excluding air cargo handling)
- + Warehousing and storage of goods;
- + Coastal and ocean freight transport;
- + Inland waterway freight transport;
- + Road freight transport;
- + Repair of machinery and equipment;
- + Other supporting service activities related to transport;

Details: Customs clearance services; freight forwarding services; bill of lading inspection; freight brokerage services; cargo inspection; sampling and weighing services; cargo receiving and acceptance services; preparation of transport documentation.

Details: Freight transport agency services (CPC 748) (excluding services of establishment, operation, management and maintenance of maritime aids to navigation, waters, maritime zones, public shipping channels and routes; survey services of waters, maritime zones, public shipping channels and routes for issuance of Notices to Mariners; survey, construction and development of nautical charts for waters, ports, shipping channels and routes; preparation and publication of maritime safety documents and publications; maritime traffic regulation services ensuring safety within waters, maritime zones and public shipping channels; maritime electronic information services; pilotage services; supporting services related to air transport; air transport business, airport operations and general aviation business).

4- Characteristics of the Company's operations during the financial year affecting the financial statements

The Company's business operations are not seasonal or cyclical in nature and therefore do not affect the Company's interim financial statements.

II- ACCOUNTING PERIOD AND ACCOUNTING CURRENCY

1- Accounting period: Begins on January 1st and ends on December 31st each year

2- Accounting currency: Vietnamese Dong (VND)

III- ACCOUNTING STANDARDS AND SYSTEM APPLIED

1- Applied accounting system:

Enterprise Accounting Regime (issued under Circular No. 99/2025/TT-BTC dated 27 October 2025 of the Minister of Finance).

2- Statement of compliance with Accounting Standards and Accounting System:

The financial statements of VIP Greenport Joint Stock Company are prepared and presented in accordance with the Vietnamese Accounting Standards (VAS), the Vietnamese Accounting System, and relevant legal regulations on the preparation and presentation of financial statements currently applicable in Vietnam.

The financial statements are prepared on the basis of compliance with fundamental accounting principles, including: accrual basis, going concern, consistency, matching, and prudence.

3- Accounting form applied: Vouchers for book entry

IV. SIGNIFICANT ACCOUNTING POLICIES

1- Principles for recognition of cash and cash equivalents:

Cash and cash equivalents of the Company include cash on hand and demand deposits or term deposits with maturities of three (3) months or less at banks; economic transactions denominated in foreign currencies are translated into Vietnamese Dong (VND). At the end of the accounting period, monetary items denominated in foreign currencies are translated at the average buying and selling exchange rates of the commercial bank where the transactions are conducted as at the end of the accounting period.

2- Principles for recognition of held-to-maturity investments:

Held-to-maturity investments are investments that the Company has the intention and ability to hold until maturity.

Held-to-maturity investments include term deposits at banks. These investments are initially recognized at historical cost. Subsequently, the finance department reviews all investments to assess and recognize provisions at the end of the financial year.

3- Principles for recognition of inventories:

- Recognition principle:

Inventories are measured at historical cost, including directly attributable costs incurred.

- Inventory valuation principle : First-in, first-out

- Inventory accounting method: Perpetual inventory system

- Method for establishing provision for inventory depreciation: Based on the difference between historical cost and actual value.

4- Principles for recognition and depreciation of fixed assets and investment property

- Principles for recognition of fixed assets (tangible, intangible, finance lease):

Fixed assets are stated at historical cost less accumulated depreciation. Historical cost includes expenditures that are directly attributable to rendering fixed asset ready to use. Expenditures incurring after the initial recognition can only increase the historical cost of the fixed asset if these expenditures definitely increased the future economic benefit from the use of said asset.

- Depreciation method for fixed assets (tangible, intangible, finance lease): Fixed assets are depreciated using the linear method to allocate the depreciable amount over their estimated useful lives or over the term of the Investment Registration Certificate, whichever is shorter. The depreciation amount is the cost of the fixed asset as recorded in the financial statements less its estimated residual value. The estimated useful lives of asset categories are as follows:

Buildings, structures: 20 - 25 years

Machinery and equipment: 5 - 10 years

Means of transportation: 5 - 8 years

Management equipment: 3 - 5 years

Computer software: 5 years

5- Principles for recognition of receivables:

- Receivables represent the carrying value of amounts due from customers, including trade receivables arising from service transactions, and other non-trade receivables not related to service provision.
- Receivables are classified as short-term or long-term in the balance sheet based on the remaining term from the reporting date to the collection due date.
- Receivables denominated in foreign currencies are retranslated at the reporting date using the actual exchange rate in accordance with Circular No. 99/2025/TT-BTC.

6- Principles for recognition of financial investments:

- Investments in subsidiaries, associates and jointly controlled entities:
Accounted using the historical cost method. Net profit distributions received from subsidiaries and associates arising after the acquisition date are recognized in the Statement of Profit or Loss. Other distributions (other than net profit) are treated as a recovery of investment and recorded as a reduction in the carrying amount of the investment
- Short-term securities investments: These are investments in securities with a recovery period of less than one year or within one operating cycle.
- Other short-term and long-term investments:

Investments are classified as short-term if the recovery period is less than 1 year or within 1 operating cycle, and as long-term if the recovery period is more than 1 year or exceeds 1 operating cycle.

- Method for establishing provisions for loss of short-term and long-term investments

Provision for loss of investment is established at year-end as the difference between the carrying (original) cost of investments recorded in the accounting books and their market value at the time the provision is established, when the carrying amount is higher than the market value.

7- Principles for recognition and capitalization of borrowing costs:

- Borrowing costs must be recognized as production and business expenses in the period in which they are incurred, unless they are capitalized in accordance with regulations.
- The capitalization rate used to determine the amount of borrowing costs capitalized during the period is calculated based on the weighted average interest rate of outstanding borrowings, excluding specific loans used for the purpose of constructing in-progress assets.

8- Principles for recognition and capitalization of other costs:

- Prepaid expenses:
Prepaid expenses relating only to the current financial year's production and business activities are recorded as short-term prepaid expenses. Expenses incurred for future periods or large one-time expenses are recorded as long-term prepaid expenses and allocated gradually to business results.
Prepaid land rent for land lease contracts effective after the effective date of the 2003 Land Law (July 1, 2004), or in cases where a Land Use Right Certificate is not granted, is recorded as prepaid expenses and allocated on a linear basis over the prepaid lease term.
- Method of allocating prepaid expenses: Linear method.

9- Principles for recognition of accrued expenses: Accrued expenses include amounts payable for goods and services received from suppliers during the financial year but not yet paid due to the absence of invoices or incomplete accounting documentation. These are recognized as production and business expenses of the financial year.

10- Principles and methods for recognizing provisions: Provisions are recognized when the Company has a present obligation (legal or constructive) arising from past events; it is probable that settlement of the obligation will result in an outflow of economic benefits; and the value of the obligation can be reliably estimated. Provisions are not recognized for future operating losses.

11- Principles for recognizing equity:

- Principles for recognizing owners' contributed capital, share premium, and other equity:
Recognized at actual amounts incurred.

12- Principles and methods for revenue recognition:

- Revenue from sales and service provision is recognized in the income statement when services have been rendered, based on the stage of completion of each transaction, determined by the proportion of services performed relative to the total services to be provided. Service revenue is recognized only when all four (4) of the following conditions are met:

- Revenue can be measured reliably. If a contract allows the buyer to return the purchased service under specific conditions, revenue is recognized only when those conditions no longer exist and the buyer can no longer return the service.
- It is probable that the company will receive economic benefits from the transaction.
- The stage of completion at the reporting date can be determined.
- The costs incurred for the transaction and the costs to complete the service provision can be measured reliably.

- Financial activity income:

Recognized when the outcome of the transaction can be measured reliably. For transactions spanning multiple periods, revenue is recognized in each period based on the portion of work completed as of the balance sheet date of that period.

13- Principles and methods for recognizing financial expenses: According to actual amount incurred, primarily from loss due to exchange rates differences

14- Principles and methods for recognizing current corporate income tax expense and deferred corporate income tax expense:

- Current Corporate income tax (CIT) is the amount of tax payable or recoverable, calculated based on taxable income and the applicable CIT rate of the current financial year. Current CIT and deferred CIT are recognized as income or expenses when determining the profit or loss of the period, except in cases where the tax arises from a transaction or event that is recognized directly in equity in the same or another financial year.

- Deferred CIT, using the liability method, is fully calculated based on temporary differences between the carrying amounts of assets and liabilities in the financial statements and their tax bases. Deferred CIT is not recognized for deferred tax liabilities arising from the initial recognition of an asset or liability in a transaction that is not a business combination and does not affect accounting profit or taxable profit/loss at the time of the transaction. Deferred CIT is determined using tax rates expected to apply in the period when the asset is recovered or the liability is settled, based on tax rates that have been enacted or are substantively enacted as of the balance sheet date.

15- Foreign exchange risk provision:

Accounts denominated in foreign currencies are revalued based on the actual exchange rate of the commercial bank where the Company maintains its accounts and conducts transactions.

Tax exemption	(12,090,114,369)	(14,090,805,823)
Remaining tax amount payable	11,470,737,497	15,697,559,315

(b) Applicable tax rate

According to the terms of the Investment License, the Company is obligated to pay corporate income tax to the State at a rate of 10% on taxable profits for the first 15 years from the first year of revenue generation, and at the standard tax rate for subsequent years. In accordance with current tax regulations, the Company has applied the preferential tax rate since 2016. Current tax regulations also allow the Company to enjoy a tax exemption for 4 years from the first year in which taxable income is generated, followed by a 50% reduction of corporate income tax for the next 9 years.

All of the above tax incentives do not apply to other income. Such other income is subject to a tax rate of 20% from 2016 (2015: 22%).

23 Major transactions with related parties:

In addition to balances with related parties disclosed in other notes to the financial statements, during the year/period the Company had the following major transactions with the related parties:
